Fried Sisters

Kyfriedsisters

### Condom Facts:

- 1.) The average condom can hold a gallon of liquid
- 2.) There is no medical reason why someone can't use a condom
- 3.) They are factory tested with electricity
- 4.) Condom use increased 39% (to 94%) from 1982 to 2006
- 5.) There are over 50 nicknames for condoms

### How to Put a Condom on:

- 1.) Make sure the condom is safe to use  
(not expired, damaged)
- 2.) Ensure you're trying to roll in the correct direction  
(The drumstick on the front show this)
- 3.) Pinch the tip and place it on the tip
- 4.) Roll down the shaft
- 5.) Have a good time!!

Hint: Putting lube IN the condom can make it a different experience for both!

### Ways to Get to Tested:

Blood sample  
Saliva sample  
Visual exam  
Digital (finger) exam

The STI status of an individual is protected healthcare information, it shouldn't be shared with anyone!

### Fluids that transmit STIs:

- 1.) Semen
- 2.) Vaginal Secretions
- 3.) Anal Secretions
- 4.) Breast Milk
- 5.) Blood
